

Tech Foundation

About Us

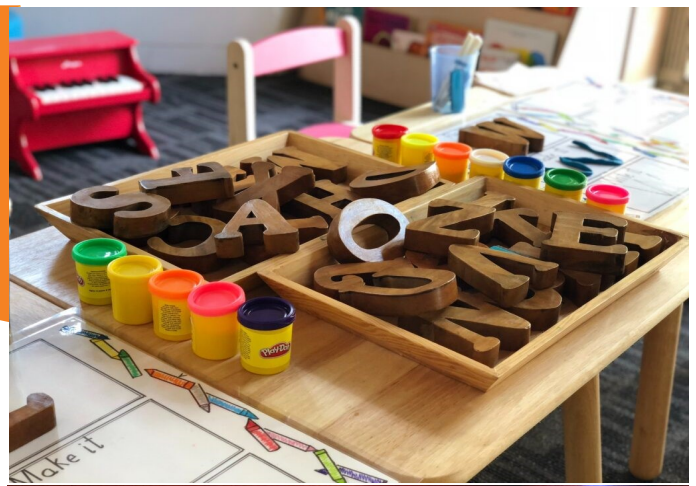

The primary objective of establishing the Tech Foundation Academy is to provide a supportive primary educational environment that uses Information and Communication Technology (ICT) as a tool in providing solid early academic foundation from pre - school to grade six.

It is our desire to use computer technology and applications at every stage of the primary education levels. We are of the view that this will develop a generation of students who will have the skills and maintain the desire to utilize the advantages of Information Technology throughout their academic journey and life. We are of the view that developing the potential of children in this way at the early stage of learning, will help them to use digital academic resources to face future challenges.

Enroll Your Kids

Visit our office every Monday to Friday from 8:00 AM to 4:00 PM at Plumkor – Brewersville

You may also call us at 0888925935 0880299478 or 0775264646 or visit our official website at techfoundationacad.org

Our Facilities

Our school features a modern well kept facility that is essential to the proper learning and recreation of all students enrolled. These include :

- ◆ State of the art Classrooms equipped with academic materials and educative recreational games, toys and equipment.
- ◆ Science laboratory
- ◆ Library
- ◆ Outdoor sports area and playground
- ◆ Internal playground that has a mini football field and basketball court and other play sets
- ◆ Computer Labs

Our Mission

Commitment to the creation and sustaining of an international environment of learning, where Information and Communication Technology (ICT) will serve as tool in transforming students academically. We endeavor to ensure that students at the early stage of learning will develop maximum academic potential from Tech Foundation Academy, thereby providing the basis for future academic success.

Our Vision

Building our status as an outstanding international institution with standard primary curriculum along with modern facilities and ICT resources that support the learning process.

Developing a distinguish primary school that will serve as a model of decency, where children will develop in the following directions:

- ◆ Learning to be healthy, active and staying safe.
- ◆ Enjoy learning and academic achievements to make positive contributions in society
- ◆ Building an early foundation in blended learning
- ◆ Understanding and developing the skills of achieving economic well being
